

**Ghada Ellithy, Ph.D.,
P.E. – President**

Ghada Ellithy received her bachelor's and master's degrees in Civil Engineering from Ain Shams University, Cairo, Egypt, with an emphasis on Geotechnical Engineering. She received her doctorate degree from West Virginia University, focusing her research on geosynthetic interfaces. Ghada worked at Tenax Corporation in Baltimore for six years in the geosynthetics field. She also was employed with Shannon & Wilson in Seattle for four years, and she joined the US Army Corps of Engineers in early 2011. Ghada has worked as a project manager and lead design engineer on a variety of geotechnical projects. Her experience includes deep foundations, retaining structures, dams and levees, pavement design, and landfill design. Ghada is a licensed professional engineer in Washington, Maryland, and Ohio.

Ghada has two children, 20 and 14 year olds. She enjoys spending time with her children, reading, playing the Piano, and improvising while cooking.
